# **Industrial Power Supplies**

### Reliable and Versatile Power Solutions

Emerson Industrial Power Supplies offer reliability, versatility and cost-efficiency so you can keep your system running smoothly without worry. Emerson power experts from SolaHD™ have created a comprehensive power supply portfolio which covers, essential, advanced, redundant, and on-machine power supply applications.

With a wide variety of capabilities, and reliable performance across the portfolio, Emerson Industrial Power Supplies can meet all of your automation and controls applications.

### **Essential: SVL Series**

SVL Series power supplies are perfect for high volume, controlled environment, and ordinary location applications where essential features are the only requirement. When space inside an enclosure is at a premium, their small footprint makes these power supplies an excellent alternative to embedded open frame switchers. The DIN rail mounting capability provides quicker and easier installation while allowing for design flexibility. These power supplies deliver 4A to 20A, at 24 Vdc.

### **Advanced: SDN-C Series**

SDN-C Series power supplies combine high efficiency and compact size with advanced features like alarm relay contact and 1.5x current rating for short periods (i.e. start-up transient). Multiple output connections allow for easier wiring of multiple devices and SDN-C units mount easily to a DIN rail for quick installation. Extensive certifications mean the these modules are suitable internationally, for harsh industrial environments and hazardous locations.

## High Availability: Redundant SDN-C Series

SDN-C Series power supplies also offer Redundancy (RED) Modules for redundant or parallel power supply operation. The RED module continually monitors the condition of two power supplies connected to a single load. If one power supply fails, the RED module automatically changes over to the other power supply. RED modules utilize MOSFET technology instead of traditional diode based solutions, leading to lower voltage drop (and less heat dissipation) for better system reliability. Output status information can be easily provided to a PLC or other control equipment, using the RED module's relay output contact.

### **On-Machine: SCP-X Series**

SCP-X power supplies provide the versatility and cost efficiency to deliver distributed field power to machine controls. With its IP67 rating, you can mount directly on the machine or production line eliminating the complexity and cost of unnecessary enclosures and excess wiring. Quick change connectors simplify connectivity for distributed I/O devices on industrial machinery. These Class 2 Listed, 24 Vdc power supplies are available in single and dual 100 Watt models and are perfect for for your rugged automation needs.

Description	INPUT		
Nominal Voltage	115 - 230 Vac		
-AC Range	85 - 264 Vac		
-DC Range 1	90 - 375 Vdc		
-Frequency	43 - 67 Hz		
Nominal Current <sup>2</sup>	1.65 - 0.55 A	3.2 - 1.0 A	
-Inrush current max.	Typ. < 15 A	Typ.<30 A	
Efficiency (Losses <sup>3</sup> )	> 88% typ. (14 W)	>90% typ. (24 W)	
Power Factor Correction	Active power factor correction to better than 0.92		
OUTPUT			
Nominal Voltage <sup>4</sup>	24 V (23.5~28.5 Vdc Adj.)		
-Tolerance	< ±2 % overall (combination Line, load, time and temperatu	re related changes)	
Initial Voltage Setting	24.5 V ± 1%		
-Ripple <sup>5</sup>	< 50 mVpp		
PARD	PARD (Periodic and Random Deviation) = 100 mV peak-pea	k max	
Overvoltage Protection	> 30.5 but < 33 Vdc, auto recovery		
Power Back Immunity	<35 V		
Nominal Current	5 A (120 W)	10 A (240 W)	
-Peak Current <sup>6</sup>	1.5 × Nominal Current for 4 seconds minimum while holdir	g voltage > 20 Vdc	
-Short Circuit Current	1.5 x Nominal Current at near zero volts at short circuit condition		
-Current Limit	PowerBoost™ (handles high inrush loads)		
Parallel Operation	Switch selectable single unit or parallel unit operation. Units will not be damaged by parallel operation (regardless of switch position setting).		
Holdup Time	>20 ms (Full load, 100 Vac Input @ T amb = +25 °C (+77 °F) to 95% output voltage		
Voltage Fall Time	<150 mS from 95% to 10% rated voltage @ full load (T amb = +25 °C (+77 °F)		
Line and Load Regulation	<0.5%		
GENERAL			
EMC:-Emissions	EN61000-6-2:2001, EN61000-6-3:2001, Class B EN55011, EN55022 Radiated and Conducted including Annex. A, EN61000-3-2		
-Immunity	EN61000-6-1:2001, EN61000-6-2:2001, EN61000-4-2 Level 4, EN61000-4-3 Level 3, EN61000-4-6 Level 3, EN61000-4-4 Level 4 input and level 3 output. EN61000-4-5 Isolation class 4, EN61000-4-11, IEC 61000-4-34 voltage dip immunity standard		
Temperature <sup>7</sup>	Storage: -40 °C to +85 °C (-40 °F to +185 °F), Operation -25 °C to +60 °C (-13 °F +140 °F) to full power, with linear derating to half power from +60 °C to +70 °C (+140 °F to +158 °F) (Convection cooling, no forced air required). Operation up to 50% load permissible with sideways or front side up mounting orientation.		
MTBF 8	> 550,000 hrs		
General Protection/ Safety	Protected against continuous short -circuit, continuous over protection IP20 (IEC60529) Safe low voltage: SELV (acc. IEC	erload, continuous open circuit. Protection Class 1 (IEC536), degree of 60950-1)	
Status Indicators	Visual: 3 status LEDs (Input, Output, Alarm) Relay: N.O. con	tact rated 200ma/50 Vdc	
INSTALLATION			
Fusing -Input	Internally fused		
-Output	Outputs are capable of providing high currents for short periods of time for inductive load startup or switching. Fusing may be required for wire/loads if 2x Nominal O/P current rating cannot be tolerated. Continuous current overload allows for reliable fuse tripping.		
Mounting	Simple snap-on to DIN TS35/7.5 or TS35/15 rail system.		
Connections	Input: Screw terminals, connector size range: 16-10 AWG (1.5-6 mm2) for solid conductors. Screw torque: 4.4 lb-inch (~ 50 N-cm).  Output: Two terminals per output, connector size range: 16-10 AWG (1.5-6 mm2) for solid conductors. Screw torque: 7 lb-inch (~ 80 N-cm).		
Case	Fully enclosed metal housing with fine ventilation grid to keep out small parts.		
-Free Space	25 mm above and below, 10 mm left and right, 15 mm in fi	ont	
H x W x D inches mm (in)	123.0 x 50.0 x 110.0 (4.85 x 1.97 x 4.36) 123.0 x 60.0 x 110.0 (4.85 x 2.36 x 4.36)

- 1. Not UL listed for DC input.
- 2. Input current ratings are conservatively specified with low input, worst case efficiency and power factor.
  3. Losses are heat dissipation in watts at full load, nominal input line.
  4. 24-28 Vdc adjustable guaranteed at full load.

- 5. Ripple/noise is stated as typical values when measured with a 20 MHz, bandwidth scope and 50 Ohm resistor.
- 6. Peak current is calculated at 24 Volt levels.
- 7. All models except the 40amp unit are capable of parallel operation by use of a jumper pin, accessible by the end user. 40 amp unit will have active current sharing signal.
- 8. Contact tech support for operation at -25oC.
- 9. Demonstrated through extended life test.
- 10. SDN 40-24-100C only = Output signaling terminal block features (Shut down, Power Good, Current Monitor, Current Balance, signal GND).

## **Specifications - SDN-C Series (Three Phase)**

Catalog Number	SDN 10-24-480C	SDN 20-24-480CD	
input			
Nominal AC Voltage (Range)	380 - 480 Vac (320 - 540 Vac), 3-phase		
Two-phase input <sup>1</sup>	Yes		
Nominal DC Voltage (Range)	600 Vdc (+/- 50 Vdc)		
Frequency	50/60 Hz		
Nominal Current <sup>2</sup>	3 x 0.8 A	3 x 0.9A	
-Inrush current max.	Typ. < 25 A	Negligible	
Efficiency (Losses 3)	91% (24W)	93% (42 W)	
Power Factor Correction	Meets EN61000-3-2 Class A	Active Power Factor Correction > 0.92	
Output			
Nominal Voltage <sup>4</sup>	24 V (23.5 – 28.5 Vdc Adj.)		
Initial Voltage Setting	24.5 V ± 1%		
-Tolerance	< ±2 % overall (combination Line, load, time and tempe	rature related changes)	
-Ripple <sup>5</sup>	< 50 mVpp	< 100 mVpp	
PARD (Periodic and Random Deviation)	100 mVpp max	200 mVpp max	
Nominal Current (Rated Power)	10 A (240 W)	20 A (480 W)	
Parallel Operation <sup>6</sup>	Single or Parallel operation selectable via front switch.		
Turn On Time	< 1 s after AC is applied to input at full resistive load ( Tamb=+25°C ). <1.5 s With capacitive load 7000μF		
Holdup Time (Full load, 100 Vac Input @ T = +25°C)	20 ms		
Voltage Fall Time	<150 mS from 95% to 10% rated voltage @ full load (T =+25°C)		
Protection			
-Short Circuit Current	Voltage output automatically goes to near zero and output is protected from continuous short circuit. Auto-recovery		
-Peak Current <sup>7</sup>	1.5 × Nominal Current for > 4 seconds minimum while	holding voltage > 20 Vdc	
-Current Limit	PowerBoost™ (handles high inrush loads)		
Back EMF Immunity	< 35 V No damage, auto-recovery		
Overvoltage Protection	> 30.5 but < 33 Vdc, auto-recovery		
Over Temperature Protection	LED Alarm and Output shutdown , auto-recovery		
Environmental Data			
Emissions	EN 61000-6-3, EN 55011 Class B, EN 55022 Class B, EN 61326-1, EN 61000-3-2, EN 61000-3-3	EN 61000-6-3, EN 55011 Class B, EN 55032 Class B, EN 61326-1, EN 61000-3-2, EN 61000-3-3	
Immunity	EN 55024, EN 61326-1, EN 61000-6-1, EN 61000-6-2, SEMI F47	EN 55024, EN 61326-1, EN 61000-6-1, EN 61000-6-2, SEMI F47	
General Protection / Safety	Protected against continuous short circuit, continuous overload, continuous open circuit. IEC 60950-1: Class I Earthed, Output is SELV (Safety Extra Low Voltage), Environmental Rating: Pollution Degree 2 IEC 60529 Ingress Protection Rating: IP20		
Temperature 8	Storage: -40°C to + 85°C, Operation -40°C to +60°C full power, with linear derating to 75% power from 60 to 70°C (Convection cooling, no forced air required). Operation up to 50% load permissible with sideways or front-side-up mounting orientation.		
Humidity	5 to 95 % RH Non-condensing, IEC 60068-2-2, IEC 60068-2-3		
Vibration	2.5g RMS, 10-2000 Hz (random); three axes for 20 minutes each - IEC 60068-2-6		
Shock	10g RMS, three axes, 11mseconds for each axis - IEC 60068-2-27		
Altitude	0 to 3000 meters (0 to 10,000 feet)		
	t control of the cont		

<sup>1.</sup> In the event of a phase loss, the power supply will continue to operate normally. However, the resulting lower rectified RMS voltage can cause excessive heat build up, which may eventually cause the unit to shut down if maximum operating temperature is exceeded.

<sup>2.</sup> Input current ratings are specified with low AC 3-phase input, line conditions, worst case efficiency values and power factor spikes. Input current at nominal AC 3-phase input will typically be half these values.

<sup>3.</sup> Losses are heat dissipation in watts at full load, nominal line.

<sup>4. 24-28</sup> Vdc adjustable guaranteed at full load.

<sup>5.</sup> Ripple/noise is stated as typical values when measured with a 20 MHZ, bandwidth scope and 50 Ohm resistor

<sup>6.</sup> All models are capable of paralleling. For redundant operation, please use external Redundancy module. Only the 40A uses active paralleling scheme. Please refer to user manual for

<sup>7.</sup> SDN 20 and SDN 40 are capable of delivering 150% load for approximately 4s before the unit will go to HICCUP mode. SDN 5 and 10 will maintain minimum 4s to deliver 150% load then drops to almost zero Vout. The output voltage will immediately drop to almost zero when load rises above 150%.

8. Contact Tech Support for operation -40°C.
